Course Aims and Objectives
Course Aims - This course aims to impart delegates with the necessary knowledge and practical skills to diagnose and treat cases of Tooth Wear in General Dental Practice.

Course Objectives - By the end of this course delegates should:

• Have an understanding of the theoretical and practical considerations of Clinical Occlusion in relation to the treatment of the worn dentition.

• Be able to effectively assess, diagnose and treatment plan for a patient presenting with wear.

• Gain the ability to apply established principals to achieve aesthetic, functional and predictable outcomes.

• Develop familiarity with the various techniques and materials commonly in use to treat tooth wear, including conventional and adhesively retained restorations.

• Develop the skills and knowledge to treat worn localized teeth using direct free hand resin application.

• Understand and prescribe ‘canine riser’ restorations.

• Be confident with the use of a silicone key derived from a diagnostic wax up to apply resin composite, utilizing a resin layering technique.

• Apply the novel ‘injection molding technique’ to efficiently and predictably treat worn mandibular teeth.

• Develop confidence in the management of the posterior occlusion in tooth wear cases.

Course USP’s
• Comprehensive course based at the world class dental postgraduate teaching centre – LonDEC,. – emphasis on “hands – on training”

• Course speakers have extensive experience on the teaching of tooth wear at a Master’s level, and have published extensively in peer reviewed journals

• Fee to include 24/7 access to online “Tooth Wear Management “ Training modules for 5 months (August to December 2014) which include training videos, reading resources, references and learning material on the topic.

Who is this course for
• Practitioners interested in the treatment and management of tooth wear in general practice.
• Clinicians wishing to develop their knowledge of practical occlusion.
• Practitioners who have a keen interest in minimal intervention dentistry.
• Clinicians who are wishing to develop and enhance their skills in the build up of the worn dentition.
